PROFESSIONAL SUMMARY

Detail-oriented technical operations and project leader with 20+ years of experience providing program/office support, records and data management, and technical service coordination in fast-paced environments. Extensive background managing service delivery programs; preparing correspondence, spreadsheets, and detailed reports; maintaining tracking systems and databases; and providing customer service to internal and external stakeholders. Experienced in supervising, recruiting, training, and evaluating staff; interpreting and applying procedures; and using Microsoft Office (Word, Excel, Outlook, PowerPoint) for daily administrative and program support tasks. U.S. military veteran with strong organizational, time-management, and communication skills.

RELEVANT WORK EXPERIENCE

Regional Service Delivery Manager | *Synergy IT* | *Chesapeake Beach, MD*

06/2024 – 12/2025

60 Hours/wk

- Managed service delivery operations for the North American managed print services business line, with substantial program support, administrative, documentation, and supervisory responsibilities.
- Directed daily administrative and operational activities for a large service delivery program, supervising 18 direct employees and coordinating work with thousands of 1099 contractors nationwide; assigned workloads, monitored productivity, and ensured timely completion of tasks in accordance with established priorities and procedures.
- Led employee recruitment, hiring, onboarding, and performance development activities for regional staff, including drafting position expectations, conducting interviews, providing training, coaching, and documenting performance feedback.
- Developed, documented, and updated administrative and service support procedures (intake processes, documentation standards, escalation paths, reporting routines) to ensure consistency, compliance, and accountability across the region.
- Prepared and maintained detailed Excel-based dashboards, tracking logs, and status reports; collected, compiled, and analyzed data; and prepared narrative summaries and tabular reports for leadership to monitor service levels, timeliness, and workload trends.
- Created, reviewed, and processed monthly billing packages for multiple customers, verifying accuracy and completeness of supporting documentation; maintained organized electronic and hard-copy files for audit and stakeholder review.
- Compiled, updated, and presented profit and loss (P&L) summaries and related financial reports, identifying variances, trends, and issues and clearly explaining findings to internal stakeholders.
- Reviewed and edited work products from subordinate staff (status updates, customer correspondence, service records, billing support) for grammar, accuracy, format, and adherence to standard templates and policies prior to submission.
- Responded to inquiries from internal and external customers, researched issues using available systems and records, and provided timely, courteous, and accurate information and follow-up, resulting in improved client satisfaction metrics.

Onsite Project Operations Manager | *BLM Technologies / Teksetra / Lake Shore, MD*

06/2016 – 05/2024

60 Hours/wk

- Key member of the technical services project management team responsible for planning, coordinating, and documenting technical service operations and support nationwide.
- Managed day-to-day project support and service delivery activities, including ticket intake, assignment, scheduling, and follow-up; ensured workload balance and timely completion of tasks consistent with established service level agreements (SLAs).
- Led recruitment, selection, onboarding, and continuing development of break-fix technical support staff; provided training on procedures, systems, and customer service; monitored performance and provided coaching and feedback.
- Served as Level 2 support for complex technical issues; documented resolutions in knowledge bases and standard operating procedures to promote consistency and reduce repeat issues.
- Reduced average case turnaround from 7-8 days to approximately 1.2 days by implementing improved tracking tools, prioritization criteria, and follow-up routines; documented these procedures and shared best practices with leadership.
- Prepared and presented daily and monthly project status reports and dashboards to executive leadership, consolidating data from multiple systems into Excel workbooks and written summaries that highlighted trends, issues, and recommended actions.
- Maintained accurate service records, logs, and documentation for managed print and break-fix services across multiple manufacturers, ensuring records were complete, organized, and retrievable for audits and client review.
- Analyzed service performance data, identified bottlenecks, and recommended changes to metrics and processes; participated in meetings with client leadership to explain data, discuss performance, and negotiate mutually beneficial service expectations.
- Utilized Microsoft Word, Excel, Outlook, and PowerPoint on a daily basis to create correspondence, prepare reports, track data, maintain calendars, and support presentations.

Technical Business Lead / Owner | *KennGTech / Lake Shore, MD*

09/2010 – 06/2016

60 Hours/wk

- Provided technical contracting, service, repair, and installation with extensive administrative, customer service, and coordination responsibilities.
- Managed all administrative functions for a small business, including scheduling, customer communications, preparation of estimates and invoices, and maintenance of service and financial records.
- Performed service, repair, and installation for digital signage, copiers, POS systems, and networking equipment; documented work performed and maintained detailed service logs for each client.
- Coordinated travel, materials, and appointment calendars; monitored monthly, quarterly, and annual travel expenditures to control costs and maintain budget records.
- Assessed client needs, analyzed existing systems, and prepared written recommendations and explanations in clear, non-technical language.
- Represented the company at regional conferences and trade shows, answering questions, providing product information, and building and maintaining customer relationships.

- Directed operations for multi-million-dollar water mist fire suppression contracts in civilian and government sectors.
- Oversaw daily operational and administrative activities, including project scheduling, staff supervision, vendor coordination, and documentation control.
- Led recruitment, selection, onboarding, and ongoing development of U.S. operations staff; provided training on company procedures, systems, and customer-service standards; monitored performance and delivered coaching and feedback to improve results.
- Conducted regular staff meetings to review project status, address issues, and ensure timely completion of milestones; documented meeting notes and action items.
- Ensured accurate and timely invoicing and revenue margin monitoring; prepared internal financial summaries and status reports for leadership review.
- Managed and maintained project files, contracts, correspondence, and technical documentation, ensuring records were organized and accessible.
- During corporate transition, was retained on contract to train new staff and document and transfer operating procedures, ensuring continuity of operations.
